Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Aldridge et al (5,737,693) in view of Stern (6,625,448).

Consider claim 5. Aldridge teaches a peripheral unit (35 and 40, fig. 3) for connecting a mobile phone terminal (RF subsystem under test 25; col. 3, ln. 35-48) with a terminal evaluation unit (PC 30, col. 3, ln. 35-56) that carries out an evaluation test of the mobile phone terminal, the peripheral unit comprising a dedicated connection port (PCIF card 35, fig. 3) for connecting the terminal evaluation unit; a first general purpose connection port for connecting the mobile phone terminal (IQ port 110 or GPIO port 120, fig. 3); a second general purpose connection port (TAC port 100, fig. 3) for connecting an external device (external source 52, fig. 3); and a format converter for converting a transmission signal format between the dedicated connection port and the first general purpose connection port (col. 3, ln. 57 to col. 4, ln. 2). Aldridge, however, does not teach that the terminal evaluation unit carries out an evaluation of acoustic characteristics of the mobile phone terminal.

Stern teaches a terminal evaluation unit carries out an evaluation of acoustic characteristics of the mobile phone terminal (col. 2, ln. 64 to col. 3, ln. 51).

Art Unit: 2643

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the teachings of Stern into the teachings of Aldridge, since one of the problems of testing communication devices, such as cellular phones, and landline phones, is how to test the acoustics in a realistic environment. Many systems that are tested in a controlled environment with controlled conditions may not perform the same once placed in use. A device that operated well during laboratory testing may be unacceptable once exposed to a realistic environment. Thus, it is important for the device to be tested in the same environment as it will be used by a customer, and on a live system, to ensure the device is working properly and the sound quality is acceptable.

*Allowable Subject Matter*

3. Claims 1-4 are allowed over the prior art of record.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc Nguyen whose telephone number is 703-308-7527. The examiner can normally be reached on 6:00AM-2:30PM.
